

DuraShake™

Rotating Aggregate Sifter

(Sieves, Pans & Covers must be ordered separately)

Easier on Your Sieves.

This free-standing DuraShake™ with digital timer improves upon the methods of traditional shakers by offering a more natural, less severe sieving action.

Here, sieves are quietly and efficiently rotated at an angle that ensures the sample is spread evenly across the mesh, and tapped individually by a series of nylon blocks – a method that closely matches the action of manual sieving. That means:

- No Clamping
- Less Sample Damage
- Less Mesh Blinding / Clogging

To operate, simply place the sieves in the chamber, tilt back, close the door, select the sieve size and set the timer.

Pricing

Model

DS110 (110vac / 50/60Hz)

DS220-60 (220vac / 60Hz)

DS220-50 (220vac / 50Hz)
